

Dear Annie

This year I have decided to participate in the Kokoda Challenge, an initiative of Cancer Council Tasmania. Now into its second year, this Challenge gives people from all walks of life the opportunity to tick something off their bucket list and also raise an enormous amount of money for a very worthy cause.

There are not many people in this state that have not been affected by cancer in some way. Two members of my immediate family have been diagnosed with different types of cancer and have been treated and thankfully have beaten the disease at this stage.

I find on Flinders Island that because we all know each other that the connection with cancer is so much higher for us, I need all my fingers to count people that have been affected that I know on Flinders in just the last few years.

Flinders Islanders have always been great supporters of great causes. I participated in Dry July for Cancer last year and had no trouble raising my target of \$500.00, and then this May I participated in The May 50K for MS and again raised over my target of \$500.00.

A condition of this event is that participants raise \$2000.00 or more for Cancer Council, Tasmania. All the funds that I raise will go to Cancer Council Tasmania and will stay in Tasmania. The trip itself is fully funded by myself.

I am writing this letter to you as Mayor of the Flinders Council to ask for a council donation to this worthy cause.

Thanking you in anticipation.

Best regards
