

To whom this may concern,

Last year I had health complications and had to undergo a heart bypass surgery. My rehabilitation was made much easier due to being able to access the Whitemark Community Gym. I felt I was able to get back to work a lot quicker than I would have been and the doctors were impressed with my recovery. In my opinion, the gym is vital for the community, especially for those people who require rehabilitation. Having the gym means people can do the rehab on island and not fly out to receive it.

Thanks,

Leigh Michell
